Author index to volume 49 (2003)

Angst, G., see Drechsler, R. 521–528
Anguera, R., see Egan, C. 557–570
Aweya, J., M. Ouellette and D.Y. Montuno, A multi-queue TCP window control scheme with dynamic buffer allocation 369–385

Badawy, W., A VLSI architecture for video object motion estimation using a novel 2-D hierarchical mesh 331–344
Bartos, R., see Kannan, R. 297–314
Becker, J. and R. Hartenstein, Configware and morphware going mainstream 127–142
Benitez, D., Performance of reconfigurable architectures for image-processing applications 193–210
Berg, S.G., see Mermer, C. 315–330
Bernaschi, M., G. Iannello and M. Lauria, Efficient implementation of reduce-scatter in MPI 89–108
Blionas, S., see Masselos, K. 155–175
Bourgeois, J., E. Mory and F. Spies, Video transmission adaptation on mobile devices 475–484
Bruguera, J.D., see Piso, D. 543–555

Cha, H., J. Kim and R. Ha, Erratum to "Bandwidth constrained smoothing for multimedia streaming with scheduling support" [Journal of Systems Architecture 48 (2003) 353–366] 59–59
Chen, H.-C. and J.-C. Yen, A new cryptography system and its VLSI realization 355–367
Cheresiz, D., B. Juurlink, S. Vassiliadis and H.A.G. Wijshoff, Implementation of a streaming execution unit 599–617
Chidester, M.C., A.D. George and M.A. Radlinski, Multiple-path execution for chip multiprocessors 33–52
Chojnacki, A., see Jóźwiak, L. 227–246
Chojnacki, A., see Jóźwiak, L. 247–265
Clematis, A. and D. D'Agostino, Evolutions in parallel distributed and network-based processing 397–398
Cortés, L.A., P. Eles and Z. Peng, Modeling and formal verification of embedded systems based on a Petri net representation 571–598
Cupak, M., see Masselos, K. 155–175

D'Agostino, D., see Clematis, A. 397–398
Danelutto, M., HPC the easy way: new technologies for high performance application development and deployment 399–419
de Macedo Mourelle, L., see Nedjah, N. 387–396
Drechsler, R., W. Günther, T. Eschbach, L. Linhard and G. Angst, Recursive bi-partitioning of netlists for large number of partitions 521–528
Duato, J., see Martínez, J.C. 441–456
Dustdar, S. and H. Gall, Architectural concerns in distributed and mobile collaborative systems 457–473

Edwards, M. and L. Jóźwiak, Special-issue on reconfigurable systems 123–125
Edwards, M. and P. Green, Run-time support for dynamically reconfigurable computing systems 267–281
Egan, C., G. Steven, P. Quick, R. Anguera, F. Steven and L. Vintan, Two-level branch prediction using neural networks 557–570
Eles, P., see Cortés, L.A. 571–598
Entrena, L., see San Millán, E. 529–541
Eschbach, T., see Drechsler, R. 521–528
Espejo, J.A., see San Millán, E. 529–541

Feil, M. and A. Uhl, Motion-compensated wavelet packet zerotree video coding on multicomputers 75–87
Ferrari, A.B., see Skliarova, I. 211–226
Flich, J., see Martínez, J.C. 441–456

Gall, H., see Dustdar, S. 457–473
Garrido, M.J., C. Sanz, M. Jiménez and J.M. Meneses, A flexible architecture for H.263 video coding 641–661
George, A.D., see Chidester, M.C. 33–52
Gokhale, M., see Wolinski, C. 143–154
Gove, R., see Mermer, C. 315–330
Green, P., see Edwards, M. 267–281
Günther, W., see Drechsler, R. 521–528
Gutiérrez, E., O. Plata and E.L. Zapata, Optimization techniques for parallel irregular reductions 63–74
